

Combined Arms Command & Control Training Upgrade System

CACTUS BAA (Internal Announcement)

April 28, 2005 - The Program Manager for Training Systems for the U.S. Marine Corps has awarded a sole source contract for the continued systems development of the Combined Arms Command and Control Trainer System (R&D and PMC) to Cole Engineering Services, Inc. 3361 Rouse Road, Suite 115, Orlando, FL 32817. CACCTUS will provide an integrated training environment for the Marine Corps ground training systems. Cole Engineering Services has extensive knowledge and experience associated with the developmental CACCTUS prototype and subsystems and will act as the Lead Developer and Integrator to accomplishing the design and develop of the CACCTUS system architecture (roadmap) for system development based upon their knowledge of, understanding of, and experience with the CACCTUS requirements. The Contractor shall lead all development, integration and test of the system and components to include interfaces, models, and functionality of the phased block development to meet roadmap goals and objectives.
