

Natural language Processor Interfacing (NALPI)

March 2005 (Internal Announcement)

The Office of Naval Research has awarded an IRAD to Cole Engineering Services, Inc. 3361 Rouse Road, Suite 115, Orlando, FL 32817, for the research and assessment of Natural Language Processing for analysis of C4I free text messages and subsequent stimulation of a computer generated force. NALPI will capture trainees' non-voice, free-text (C4I) communications and process it to stimulate the OneSAF Objective System (OOS) to respond as the real world force(s) would. Cole Engineering Services has extensive knowledge and experience associated with C4I and the SAF domain as well as real world experience in Natural Language Processing and systems integration. The Contractor will lead in assessing and evaluating state-of-the-art technology in Natural Language Processing and in assessing and planning the integration of these disparate systems.
