

Live, Virtual, Constructive - Integrating Architecture

September 2005 (Internal Announcement)

Orlando, FL - September 7, 2005 - PEO STRI (US Army) has awarded a sole source contract to Cole Engineering Services, Inc. 3361 Rouse Road, Suite 115, Orlando, FL 32817 for the research of Live, Virtual and Constructive Domain Functional Requirements that will provide analytic support to future decisions within each domain; gap analysis of the existing efforts within the domains; redlining of existing LVC-IA DoDAF artifacts; and reporting to supplement the requirements database. Cole Engineering Services has extensive experience in Army Virtual and Constructive domains, and experience in USMC Live, Virtual and Constructive domains. The Contractor shall provide deterministic and analytic support involving key areas such as current capability evaluation and business process reengineering, mission and strategy alignment, and impact analysis of proposed system changes across the entire modeling and simulation environment.
